

Based on newly adopted NJ regulations for lead line replacement, the NJDEP is requiring public water systems to submit a Service line inventory with a deadline of January 22, 2022.

Also, part of this requirement is to post the service line inventory on the Park Ridge Borough website by the January 22, 2022, deadline.

This survey consists of all addresses in Park Ridge and Woodcliff Lake customers, with information if the lines have been confirmed to be copper, lead, galvanized, or other types of service line materials. We will also be including on the website in the near future a service self-identification survey that residents can fill out and submit which will assist us with the required service line material inventory.

A third requirement will be to send a Consumer notice by certified mail to the resident's that have been identified to have a lead or galvanized service. As of this time the identified lead or galvanized lines are all in Park Ridge.

The Certified letters will need to be mailed no later than February 21, 2022.

- 1. Due 1/22/2022 - Submit Lead service inventory to NJDEP**
- 2. Due 1/22/2022 - Post Lead service inventory to the Park Ridge Borough Website in the same location as the Water Quality report.**
- 3. Due 2/22/2022 – Consumer Notice by Certified mail to those with confirmed Lead service lines. At this time there are no confirmed Woodcliff Lake Lead Service lines identified.**
